Palmer discloses first and second sections non-rotatably mountable to each other by a male correspondingly shaped non circular annular flange (Ref. No. 45, Fig. 9A) slidably mating into a female non circular flange relief (Ref. No. 46, Fig. 9A). Palmer does not disclose the entire annular flange received in a relief. Palmer only discloses the bottom part of the flange received in a relief.

Subj: 10/629,750 (Attorney Docket No. ACE-18914)

This proposed amendment (enclosure (1)) having an entire annular flange received in a relief would overcome Palmer (U.S. 4,664,382) which has part of the annular flange being non circular and part of the flange inserted into a relief. However the entire flange of Palmer is not received in the relief. Please call me to agree and suggest other changes (703-308-2712).

Sincerely, Stephen Blau
